

Skills

- **Backend:** Java (Spring Boot), Python, Microservices, REST APIs, Hibernate, Scheduling, Spring Batch, AI Integrations (Azure), Kafka, Splunk
- **Frontend:** React (Beginner), HTML, CSS, JavaScript
- **Automation:** Cucumber, Selenium
- **Databases:** SQL, MySQL, PostgreSQL **Cloud:** Azure, Azure AI Foundry, Cloud-native applications
- **DevOps & CI/CD:** Azure CLI, GitHub Actions
- **Tools:** Docker, Tomcat, JIRA, SonarQube, Swagger, Git, Bash, Rally, Postman, Insomnia, Azure AI Foundry

Experience

System Engineer — Tata Consultancy Services (TCS)

Hyderabad
May 2025 – Present

- **United Healthcare Group (UHG):** Healthcare Domain Project (1+ Years)
- Developed a microservice named **Intake Service** that consumes blob events to create database records and schedule validation tasks.
- Designed job schedulers to process and validate batch zip files, extract documents, and create jobs for each entry inside the archive.
- Implemented a **Double Scheduler Service** using **Zip4J** to validate zip archives, check TIFF integrity, extract metadata, and create jobs in the database.
- Collaborated with **Azure AI Document Intelligence**, creating and training models to interpret structured medical claim forms such as *UB04*, *CMS1500*.
- Utilized **Azure AI Document Intelligence** extensively to train, fine-tune, and validate models, ensuring accuracy and scalability in healthcare claims automation.

Software Engineer — Infogain India Pvt. Ltd.

Pune
Oct 2021 – May 2025

- **Sabre Project:** Travel Booking Platform (2 Months)
- Contributed to QA automation using Java, Selenium, and Cucumber for regression and functional testing.
- **FedEx Project:** Logistics & Sustainability Insights Platform (2.5 Years)
- Developed Spring Boot microservices, REST/SOAP APIs, and database integrations with Oracle and PostgreSQL.
- Authored API documentation using Swagger, ensured code quality via SonarQube, improved performance by refactoring core logic.
- Actively supported Agile development, CI/CD workflows, and production deployments.
- **Internship:** 10-month full-stack training (Java, Spring Boot, Hibernate, HTML/CSS/JS).

Projects

AI Service ChatFlow — Azure Foundry-Deployed Model

[on GitHub](#)

- Designed an AI-powered chat application by deploying a custom model to Azure AI Foundry.
- Integrated document processing flows using trained Azure Document Intelligence models for form understanding.
- Built complete pipeline combining prompt handling, microservice orchestration, and UI integration.

MATCHMaticAI — Ollama AI-Powered Resume Scanner & Chatbot

[on GitHub](#)

- Integrated Ollama AI with Spring Boot backend for intelligent resume parsing.
- Added interactive web frontend and containerized deployment through Docker.

COVID-19 Tracker — Realtime Monitoring with Spring Boot

[on GitHub](#)

- Created a dashboard to track and visualize global COVID-19 case data.
- Optimized data retrieval and presentation using Spring Boot and REST APIs.

BRICKStorm — Smash, Bounce, Break & Win!

[on GitHub](#)

- Developed a 2D arcade-style brick breaker game in Java.
- Implemented dynamic ball movement, collision detection, and responsive UI.

Education

MCA	G H Raisonni Institute of Information Technology, Nagpur	2022
BCA	St. Francis De Sales College, Nagpur	2019

Certifications

Java (HackerRank) React (Meta) Generative AI (Deeplearning.ai) Prompt Engineering - AI-900 (Udemy) Digital Marketing (Google)

Achievements

Spot Award (Infogain - FedEx Project) Code Gladiators Semi-Finalist HackerRank Gold Badge (Python)
