

YASEEN SHEIKH

Last updated in April 2025

in LinkedIn/YaseenSheikh  GitHub/YaseenSheikh  7875869377  official.yaseen.sheikh@gmail.com  Hyderabad

Skills

- **Frontend:** React, HTML, CSS, JavaScript
- **Backend:** Java (Spring Boot), Kotlin, REST APIs, Microservices, Hibernate, Scheduling, Spring Batch
- **Automation:** Cucumber, Selenium
- **Databases:** SQL, MySQL, PostgreSQL **Cloud:** Azure, Cloud-native applications, Render
- **DevOps & CI/CD:** Azure CLI, GitHub Actions
- **Tools:** Docker, Tomcat, JIRA, SonarQube, Swagger, Git, Bash, VisualVM, Rally, Postman, Insomnia

Experience

Software Engineer

Infogain India Pvt. Ltd.

Pune

Oct 2021 – Present

- **Project:** Serko GetThere (2 Months)
- **QA Automation Exposure:** Worked on automation testing using Java, Selenium, and Cucumber. Gained hands-on experience writing and executing automation test cases for a new feature in the project.
- **Project:** FedEx Sustainability Insight & FDX (2.5 Years)
- **Technical Development:** Experienced Java Backend Developer specializing in Spring Boot, Microservices, REST/SOAP APIs, and database management (Oracle, PostgreSQL, SQL). Designed and maintained scalable backend microservices, building robust RESTful APIs and refactoring core modules to support high transaction volumes. Focused on effective dependency injection, modular service design, and performance optimization. Implemented best practices in ORM mapping, connection pooling, and optimized query execution using Spring Data JPA. Ensured seamless integration and error handling with custom exception handlers, logging, and monitoring. Additionally, optimized data processing by transforming large datasets into efficient Excel/CSV formats and integrated Selenium/Cucumber for automation testing.
- **Quality Assurance & Documentation:** Authored extensive JUnit 5 test cases for robust coverage, created comprehensive API documentation with Swagger, enforced code quality standards via SonarQube and JaCoCo, and conducted performance tuning to support high-throughput processing. Experienced in DevOps, Agile methodologies, production support, and developing scalable, high-performance solutions.
- **Internship:** (10 Months): Trained in Java/SpringBoot/Hibernate/PL-SQL/Microservices/HTML/CSS/JS

Projects

MATCHMaticAI — Ollama AI-Powered Resume Scanner & Chatbot

on [GitHub](#) 

- Developed a scalable web application integrating Ollama AI with a Spring Boot backend and interactive HTML/CSS/JS frontend.
- Integrated Docker for seamless containerization and deployment.

COVID-19 Tracker — Real-Time Global Case Monitoring with Spring Boot

on [GitHub](#) 

- Developed a comprehensive web application to track and display real-time COVID-19 statistics.
- Built backend using Java and Spring Boot for efficient, scalable data processing.
- Designed a user-friendly frontend for monitoring virus spread and statistics.

BRICKStorm — Smash, Bounce, Break & Win!

on [GitHub](#) 

- Designed and developed a 2D brick breaker game in Java.
- Implemented gameplay mechanics including paddle control and ball dynamics.

Education

MCA G H Raisoni Institute of Information Technology, Nagpur

2022

BCA St. Francis De Sales College, Nagpur

2019

Certifications

Java (HackerRank) | React (Meta) | Generative AI (Deeplearning.ai) | Digital Marketing (Google)

Achievements

Spot Award (Infogain - FedEx Project) | Code Gladiators Semi-Finalist | HackerRank Gold Badge Python
